3. Read the given passage and answer the questions : 5

Global warming is the increase in the world's temperature and changes in the world's climate caused by carbon dioxide from our cars, factories and power plants. Many scientists believe that the world is getting warmer and that this will affect our oceans, weather and agriculture. Some even believe that

countries and cities near the coast will disappear as sea-levels rise. However, not all scientists are convinced that global warming is happening and many politicians do not want to change their policies of economic development.

*Questions :*

- (i) What is global warming ?
- (ii) What will disappear as sea-levels rise ?
- (iii) What will scientists believe ?
- (iv) What do the politicians not want to change ?
- (v) Give suitable title.

4. Write a report on any *one* of the following : 5
