**Section - C****Short Answer Type Questions**

Q.3. Read the following passage carefully and answer the questions given below: 1×5=5

Many people believe that Science and Religion are opposite to each other. Science is said to be the result of Man's observation, research and experience. Religion is based on faith, devotion, dedication and spirit of sacrifice. Science and Religion are similar in certain respects. Both intend to explore the truth, though in their own way. Science aims at bringing about more comforts, facilities and material gains to man. Religion aims at bringing about spiritual benefits to man such as realisation of God, contentment, peace of mind

(7)

etc. The scientific research is individualistic in nature or at the most it depends on team-spirit. Religion is individualistic as well as community based in nature. All religion teach one and the same thing i.e. to express belief in God. They lay stress on faith, simplicity, high character and spiritualism.

Questions:

- i) What is the difference between Science and Religion?
- ii) How are they similar?
- iii) What is the aim of science and religion?
- iv) What is the nature of Science and Religion?
- v) What does religion teach us?

Q.4. Write a report on any one of the following topics:
